

Remote Epic Hyperspace Access

There are several way to reach Epic when away from the Health System. The following guideline presents a streamlined and efficient method.

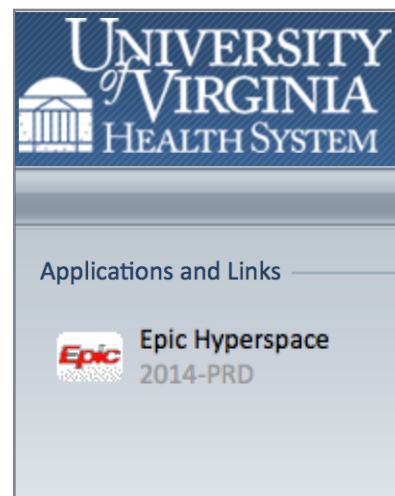

The screenshot shows a web browser window with the address bar displaying `apps.hscs.virginia.edu`. The page header features the University of Virginia Health System logo. Below the header, the text "University of Virginia Health System" and "Remote Access" is displayed. There are three input fields: "Username", "Domain Password", and "Token Password". A "Logon" button is located at the bottom left of the form.

Start by navigating to the following website:
<http://apps.hscs.virginia.edu>

Add your Health System credentials along
with the digits generated by your VPN token.

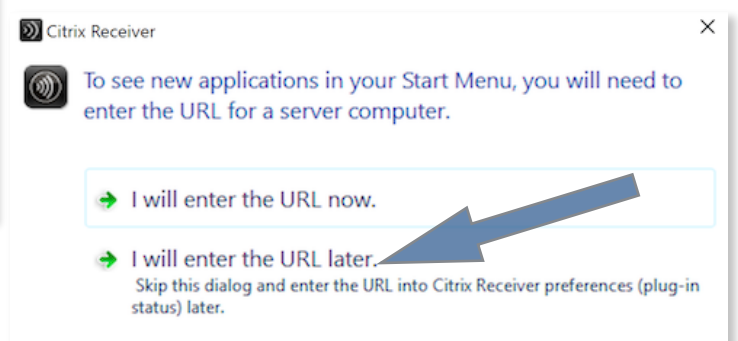

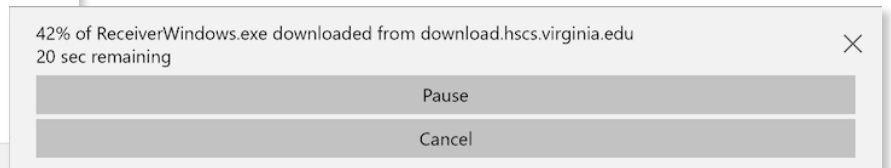

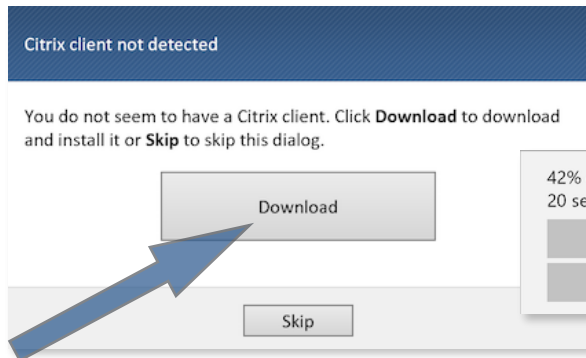

Once successfully logged in choose
the Epic Hyperspace application.

**To use these apps the Citrix Receiver client will need to be installed.
If it is absent you will be prompted to download and install.**

Follow these quick steps to complete the Receiver install.

It is not necessary to add the URL into the Receiver app to launch remote apps using this method.

After Receiver has been installed simply relaunch the departmental app from the folder as previously illustrated.
