Add-Vendor VPN Implementation Process

1. HIT customer identifies need for connectivity through the Add-Vendor VPN mechanism.
2. New Request?
   - Yes: HIT Security sends Add-Vendor form to customer.
   - No: HIT Security sends the previously approved Add-Vendor form to customer for changes and additions.
3. Customer completes Add-Vendor form.
4. HIT Security reviews, suggesting modifications if needed, then approves the application.
5. HIT Security records data in Vendor VPN Tracking database.
7. VPN access active
