

General set-up instructions are available at:

<http://www.medicalcenter.virginia.edu/mobile-device-setup>

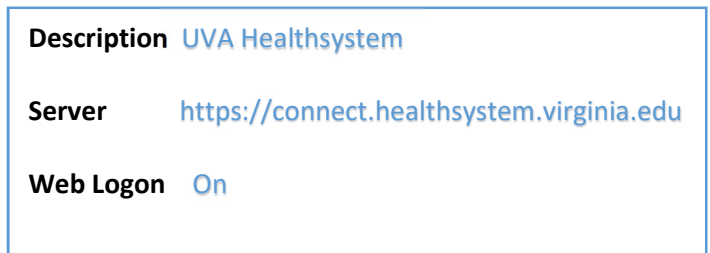

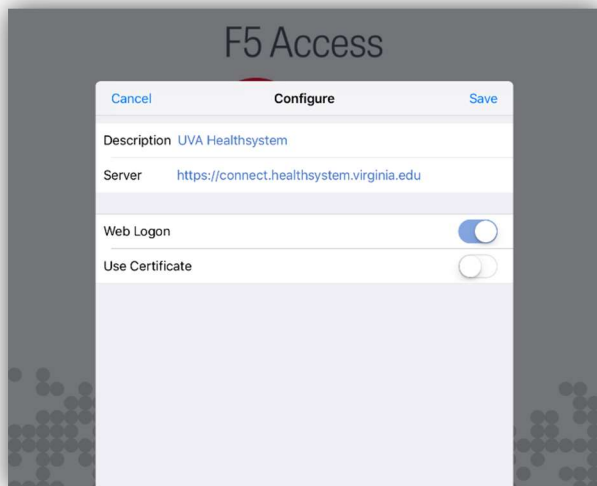

These will ensure that you have MobileIron installed which is a necessary preliminary step.

### 1. Configuring the VPN Software (F5 Access) on Your Smartphone or iPad

Open the F5 Access Client. You will be prompted to accept the user agreement. Click **Enable** then **Next** then **Add New** (next to **Configuration**).

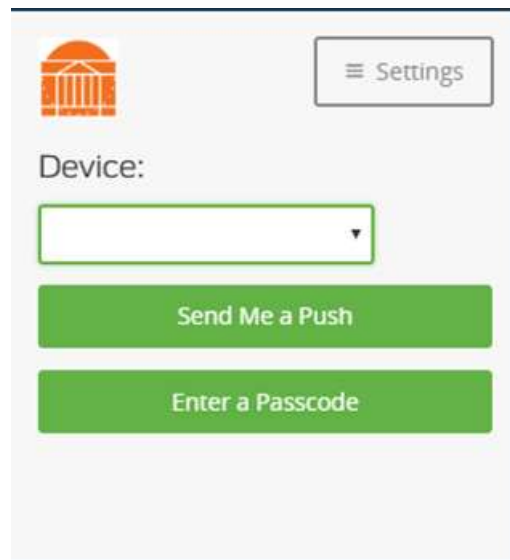

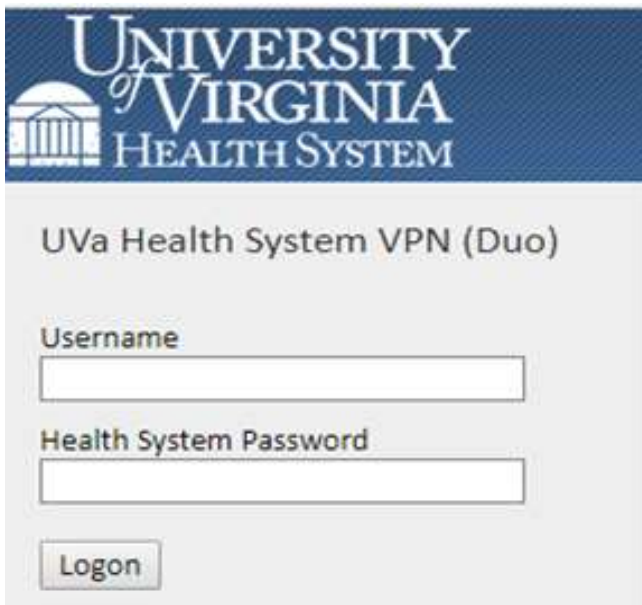

Complete the configuration as shown in the figure below then click **Save** at the top right corner.

Now you are ready to connect to VPN. Flip the Connection switch to initiate a VPN session. As soon as you flip the switch, the *Secure Logon* page will appear.

**2. Log into the Health System network using your username (computing ID) and password. Finish with 2-step authentication.**

When you are connected to VPN, you will see the status timer. To end the VPN connection, flip the switch next to Connection.
